PROFILE

Data and System development with 11+ years of experience spanning ETL SQL development , database administration, application development and production support. Strong expertise in database design, SQL performance tuning, data integration, system migration and validation with hands-on experience supporting database environments on AWS. Experienced in developing and supporting human resource management system, inventory management and automated cargo clearance systems using technologies including VB.NET, Java, and Spring Framework. Skilled in Python and shell scripting to automate data workflows, improve data quality and support reliable business operations.

KEY SKILLS

Database Platforms: Microsoft SQL Server, Oracle, PostgreSQL.

SQL Development & Optimization: Complex queries, stored procedures, functions, triggers, views, database and schema design, indexing, execution plan analysis, and query performance tuning.

ETL & Data Integration: SSIS, DMExpress, Exasol, data extraction and transformation, migration, cleansing, validation, reconciliation, and integration across database platforms.

Reporting & BI: SSRS, Crystal Reports, XtraReport, MecWise Report Server and preparation of datasets for analytics and business reporting.

Automation & Scripting: Python, shell scripting, VBA, batch processing, workflow automation and job scheduling with JAMS Server.

Database Administration & Security: Installation, configuration, monitoring, access control, backup and recovery, disaster recovery and SQL Server Always On Availability Groups.

AWS & Cloud Databases: Amazon RDS, SQL Server on Amazon EC2, Amazon Redshift, Amazon S3, AWS Database Migration Service (DMS) and AWS Identity and Access Management (IAM).

Testing & Deployment: Unit testing, system integration testing (SIT), system testing, UAT support, data validation, release and deployment support and production troubleshooting.

Development & Collaboration Tools: Java, Spring Framework, VB.NET, NTT DATA VISC, MecWise in-house tools, Redmine, Jira, and Confluence.

EDUCATION

DEGREE & DIPLOMA

B.B.A. Program in Logistics and Supply Chain Management
Southeast Bangkok University, Thailand | Jan 2026 – Present

Bachelor of Arts in Geography
University of Yangon, Myanmar | Jan 2006 – Jan 2010

Advanced Diploma in Information Technology
University of Yangon, Myanmar | Jan 2009 – Jan 2011

Diploma in Artificial Intelligence for Business & Finance

ABE UK | Jan 2020 – Dec 2020

CERTIFICATIONS & TECHNICAL TRAINING

SQL Server & Reporting

- Microsoft SQL Server Database Administration Course
- SQL Server Security Best Practices – Protect Your Data
- Working with Python on Windows and SQL Server
- Professional Certificate in SQL and SQL for Data Analysis — MTF Institute of Management

AWS & Cloud Databases

- Mastering SQL Server RDS on AWS
- AWS Database Specialty — specify whether this is an earned certification or a training course

Oracle

- Advanced Oracle PL/SQL

Cybersecurity

- ISC2 Certified in Cybersecurity (CC) 2025 — specify whether certification was earned or training was completed
- Mastering SQL Injection

Additional Training & Assessments

- Java 8 Programming — IKM Assessment, 81/100
- HRIS Administrator

AWARDS

01/06/2022 — **Special Recognition Outstanding Award**
Ericsson Myanmar

01/04/2015 — **Omoiyari Award**
NTT DATA Myanmar
The sympathy and empathy for others that leads to thoughtful action.

PROJECTS

01/2026 – Present

Part Time Consultant Academic Researcher Data Analyst
- Supported academic research at Chulalongkorn University by extracting, cleaning, transforming, and analyzing survey datasets.
- Processed and managed survey data using KoboToolbox, ensuring data quality and consistency.
- Conducted statistical analysis using R to support research findings and reporting.
- Prepared and validated research datasets and visualizations to support academic research projects and data driven analysis.

11/2022 – 02/2024

Digital alchemy thailand
Position: ETL Database Developer
Projects: Rabbit Reward BTS and Virgin Money Australia
- Developed and maintained SQL queries, stored procedures and ETL workflows to support data processing, integration and business operations.
- Integrated data across Oracle, DMExpress, and Exasol environments and prepared validated datasets for Salesforce Marketing Cloud.
- Automated data processing, ETL execution and job scheduling using shell scripting and JAMS Server.
- Supported database operations across Development, SIT/UAT and Production environments, including troubleshooting, SQL performance tuning, and root cause analysis.
- Tested and validated database changes, supported production deployments, and monitored results to ensure reliable operation.
- Managed production incidents through Jira and Redmine from investigation and defect resolution through deployment and closure.
- Maintained technical documentation in Confluence and coordinated with cross-functional teams to resolve issues and deliver changes.

12/2018 – 07/2022

Ericsson Telecommunication — Yangon, Myanmar
Position: Database Administrator
Systems supported: Field Service Operations inventory management and asset-tracking systems.
- Designed and maintained SQL Server infrastructure supporting critical inventory and asset-tracking operations with a focus on availability, data protection, and operational reliability.
- Configured SQL Server Always On Availability Groups to support high availability, failover and disaster recovery.
- Managed database performance tuning, security, and backup and recovery activities to maintain stable and reliable database operations.
- Provided production database and SQL support, investigating incidents, performing root cause analysis, and coordinating fixes through deployment and closure using Redmine.
- Automated data processing and operational tasks using Python and VBA to reduce manual effort and improve data accuracy.
- Configured NAS storage, MikroTik networking, and security rules to support reliable connectivity and secure access to operational systems.
- Delivered technical support and training to Field Service Support Engineers, supported IS/IT audits, and provided IT security training.

- Reported technical issues, operational risks, and resolution progress to the Head of Field Service Operations and senior management.

02/2014 – 11/2018

NTT DATA Myanmar — Myanmar, Japan, and Vietnam
Position: System Engineer
Project: Myanmar Automated Cargo Clearance System

- Developed and enhanced air and sea cargo management modules using NTT DATA VISC Java Spring Framework .
- Delivered application changes across the full Waterfall development lifecycle, from requirements analysis and design through development, testing and deployment.
- Supported application and database integration work to implement cargo processing requirements and maintain consistent system behavior.
- Conducted code reviews, investigated defects and applied coding standards to improve application quality.
- Managed development tasks and technical issues in Redmine, including defect tracking, root cause analysis, resolution and progress reporting.
- Supported system testing and User Acceptance Testing (UAT), validating business requirements and resolving issues before deployment.
- Collaborated with cross-functional teams to coordinate implementation activities and support project delivery.

09/2011 – 10/2013

Starvision Information Technology — Malaysia and Myanmar
Position: Application Engineer
Projects: PSMB Malaysia HR Goverment and CPOC Oil and Gas Concession Malaysia — HRMS

- Supported MecWise HRMS implementation and enhancements across employee records, payroll, leave, claims and benefits, time management, and employee self-service modules.
- Performed ETL and data migration activities, including data cleansing, validation, reconciliation, and SQL Server database support.
- Supported production databases and investigated application and data issues to maintain HRMS data integrity and system availability.
- Developed and enhanced HRMS functionality using MecWise in-house tools and VB.NET to address client business requirements.
- Developed HR and management reports using MecWise Report Server to support operational reporting needs.
- Worked with client HR and IT teams to gather requirements, troubleshoot defects, and implement system enhancements.
- Supported UAT data validation, user training, and post-implementation troubleshooting to help maintain reliable HR and payroll operations.
